

Proceedings
of the
24th Working Group Bipolar

May 6, 2011

at

Infineon Technologies
Munich, Campeon

Volume 1

Volume1

No.	Author(s)	Company	Titel
01	Joerg Berkner	Infineon	Member Matters
02	Andreas Pawlak	TU Dresden	Introduction to the AKB Forum
03	Christian Raya Bertrand Ardouin	XMOD	Review and Advances in Emitter Extraction Methods
04	Zoltan Huszka Ehrenfried Seebacher	AMS	Extraction of the Diffusion Voltage and the Fixed Part of Junction Capacitance
05	Peter Baureis	FH Wuerzburg	Modeling of BFP740 using HICUM L0V1p2 with QUCS
06	Gerhard Fischer	IHP Frankfurt	HICUM/L2 Models for SiGe-HBTs in IHP 0.13 μm BiCMOS Technology
07	A.Bhattacharyya, C. Maneux, S. Frégonèse, T. Zimmer	IMS	NQS modelling with HiCuM: What works, what doesn't

Volume2

No.	Author(s)	Company	Titel
08	Nicolas Derrier	ST	Description of a SGP Extraction Flow for natural substrate pnp transistors. Tricks and traps...
09	Biswanath Senapati	AMS	Characterization and Modeling of Lateral PNP Bipolar Transistor in CMOS Process
10	Joerg Berkner	Infineon	Cold S-Parameter Measurements on Vertical PNP Transistors
11	J. Bazzi, A. Curutchet, P.Baureis, T. Zimmer	IMS	On-Si calibration vs ISS calibration
12	Wolfgang Kraus	Telefunken	Software for Statistical Device Modeling: Use R!
13	Klaus-Willi Pieper	Infineon	Calculation of standard deviations and correlation coefficients for bipolar transistors
