

19th HICUM Workshop 2019

at

Infineon Technologies AG
Am Campeon 1-12, Neubiberg
Germany

May 13 & 14, 2019

(two half days)

- The High Current Model (HICUM) has been an industry standard and one of the most accurate compact models for BJTs and HBTs, covering a wide range of high-frequency (including mm-wave and sub-mm-wave) applications.
- Since 2001, the annual HICUM Workshop has become a technical forum for model users (incl. circuit designers) for discussing their results as well as present trends and future needs of the bipolar transistor modeling design community.
- Workshop focus:
 - Presentations on modeling of various bipolar transistor phenomena
 - New parameter extraction methods and strategies - this year's special feature: demonstration of parameter extraction system using license-free tools
 - Model development, testing and performance comparisons
 - Model applications in circuits and special requirements for circuit design

Learn about the latest developments from the experts in the field

Attendance is free of charge

Important Dates: Abstract submission deadline: April 10, 2019

Abstract includes: title of the presentation with up to 1 page summary; requested presentation time slot (20min or 40min, larger time slot is also possible). The sole purpose of the abstract is to determine the length of the workshop and to organize the presentation schedule.

Slides submission deadline (for print): April 29, 2019

Please email your Abstract & Presentation to **Christoph Weimer** (christoph.weimer@tu-dresden.de)
