NEUROTECH Prize at MEMRISYS 2019

for the best work on memristor-based hardware and applications in the field of neuromorphic computing technology

The **project NEUROTECH** (https://neurotechai.eu/) offers a prize of 500 € for the best contribution presented at the MEMRISYS 2019 conference toward a work on novel memristor-based hardware and applications in the field for neuromorphic computing technology. Innovation can be either at device and/or circuits and/or system level with a clear perspective towards applications. Contribution related only to theory/simulation without an experimental demonstration are not considered for this price.

The price is open to any type of contributions at MEMRISYS 2019 (oral, poster and demo) presented by early career people (Ph.D. students, and postdocs / young researchers up to 7 years from the Ph.D. award).

The authors interested to participate to the prize award are requested to send an e-mail to Ms. Lempke (email: Office@Memrisys2019.org) *before end of June, including the following information: abstract number, abstract title and presenting author, date of Ph.D award.* The winner will be selected by a committee during the conference.
