Abstract—This document defines the style guidelines and submission process for papers to be presented at the “18th International Workshop on Nonlinear Dynamics of Electronic Systems 2010” (NDES2010) held in Dresden, Germany, May 26-28, 2010. It is written in the described style and may be considered as a reference.

I. MANUSCRIPT SUBMISSION

Authors are kindly invited to submit a manuscript of the (draft) paper before **January 10, 2010**. The maximum paper length is **4 pages** for all papers. Please use **PDF** files for submission. Detailed information about how to submit a manuscript can be found at the workshop website.

<http://ndes2010.org/>

After review by an international committee of reviewers, authors of accepted papers are requested to prepare a camera-ready manuscript for the NDES proceedings. The review committee can request (slight) changes of, or additions to the manuscript. All **final camera-ready papers** must be submitted to the conference organization **not later than April 1, 2010**.

Papers will only appear in the proceedings, if at least one of the authors has pre-registered for the workshop before the early-registration deadline: April 1, 2010.

II. LAYOUT SPECIFICATION

As it is intended to publish all conference papers at IEEE Xplore, all final papers have to be formatted according to the specifications for IEEE conference proceedings on an A4 paper size [1]. All authors are asked to use the LaTeX, OpenDocument, or MS Word templates, which are provided at the workshop website.

Please strictly follow these specifications. Papers not complying with it (esp. in layout geometry and typesetting) will not be included in the proceedings!!

A brief description of the layout (provided by the IEEE [1]) is given below.

A. Geometry and Typesetting

The document must be created using the A4 paper size (210mm × 297mm) and set in two columns. For the paper the Times New Roman font in 11 pt size with single spacing should be used.

B. Title

The title of the paper appears on the first page, centered over both columns and is set in 24 pt letters.

C. Author Name(s) and Affiliation(s)

The author names appear below the title in 12 pt size. The affiliations should be given below the author names and should contain necessary information for contacting the authors (i.e. postal address, email, etc.). Please typeset the affiliations in 11 pt normal style.

D. Headings

Section headings should appear in 11 pt, caps letters. Please center the section headings with respect to the columns. Sections are numbered with roman numbers.

Subsection headings are set in italic, 11 pt, but not in caps letters. They are aligned on the left of a column.

E. Figures, Tables, etc.

Figures should be numbered in the order of appearance in the paper. Please give each figure a caption, centered under the figure (see fig. 1). Please set the dimension of the figures as large as the width of a column. You may

include figures stretching over both columns at the top of a page.

Fig. 1. Conference logo

Other objects with variable position (e.g. tables) are treated in the same way as figures.

F. Equations

Equations are centered with respect to the columns. If necessary, they may possess a reference number on the right, e.g.

$$A = (B + C)^D \quad (1)$$

III. CONTENT REQUIREMENTS

A. Abstract

The paper should start with an abstract giving a short overview on the discussed matter and the presented results. With respect to the layout the abstract is written in 10 pt, and it is not considered as a separate section.

B. References

Please list and number all references in the order of appearance at the end of your document. Use square brackets for the reference list and the citations, e.g. [2].

Please treat the references as a separate section, do not number and use 9 pt for the reference entries (for an example see the references section of this document).

IV. CONCLUSION

The conclusion goes here.

ACKNOWLEDGMENT

The authors would like to thank...
